

# Military Cranes in Action

**PALFINGER**

## *PK 35000 multi purpose carrier vehicle*

### **Radio remote control**

The PALFINGER remote control with digital data transfer and feedback unit on the control panel provides the driver with a maximum of security and comfort. No matter from how far away the crane is being controlled, the integrated display in the control panel gives the crane driver continuous information about the current load condition of the crane.

The Belgian army decided to stop the function of vehicles Matenin planned in the beginning for the placing of mines in all terrain. Nowadays the vehicle is equipped with a PALFINGER PK 35000 with the aim of having the possibility to install hospitals in the battle field, repairing of transmissions and multiple work. This could be carried out by use of a grab, pallet fork, hydraulic winch and a workman basket for two soldiers. With special load manipulators even barges for

staff transport could be easily lifted.

### **Technical feature:**

**Hydraulic outreach** 12.4 m

**Max. lifting capacity** of 7370 kg at 4.4 m

- Continuous rotating
- Remote control system for save crane operation
- Overload protection system
- Load capacity indicator
- Stabilizer of rigid design
